## Photo Tips

*Try to take your photos at rehearsals.*

*Make sure there's good lighting.  
Use fill-in flash as needed.*

*Set your digital camera to its highest resolution  
for best reproduction. We prefer submissions  
in JPG or TIF format.*

*Limit your photo to four or five actors.*

*Get in close to see your actors' expressions,  
not the curtains, cables, or even worse, the back  
of the heads of the audience during a performance.*

*Don't pose your actors in a line. Get them into  
character for more interesting facial expressions  
and body language.*

*Empty spaces are boring, so keep your actors close  
together to tell the photo's "story."*
